EDUCATION

University of Michigan - College of Engineering
Bachelor of Science in Engineering in Computer Science

Ann Arbor, MI
December 2025

SKILLS

- **Technical:** Python, C/C++, React, Flask, HTML, CSS, SQL, Git, Figma, JavaScript, Tableau, Linux, AWS, Docker, RESTful APIs
- **Languages:** Fluent English, Fluent Spanish

TECHNICAL EXPERIENCE

ITS Teaching & Learning - Ann Arbor, MI

May 2022 - Present

Computer Consultant III & Support Technician Associate I

- Achieved **smooth functionality, accessibility, and adoption** for staff by **testing and validating new UI features (CRUD, UX experience)** in Canvas by **validating** new buttons and performing **negative testing to uncover edge cases/failures**.
- **Boosted** student engagement & **reduced** instructor requests by **~20%** by filming & editing **40+** instructional videos with Capcut.
- **Supported** departmental requests to **optimize data analysis by 90%** by **identifying usage trends** using Google Colab.
- Secured **adoption** of new Canvas tool (**Annoto**) that **boosts student engagement** by **advocating and presenting trend visualizations created in Tableau** from **analyzing KMC data** about video usage.

LEADERSHIP EXPERIENCE

Walgreens - Chicago, IL/ Ann Arbor, MI

June 2023 - Oct 2025

Shift Lead

- **Led and scheduled** a 15-member team to **optimize** task management and customer flow, achieving **100%** task completion, **30%** higher efficiency, and **5%** rise in top-rated surveys.

Walgreens - Chicago, IL

May 2024 - Aug 2024

Community Management Intern

- **Trained staff** and **optimized operations** to maintain **100%** inventory accuracy and **boost customer satisfaction by 23%**, driving a **6%** sales increase through **insights, promotions, and vendor partnerships**.

PROJECTS

Cross-Platform Flutter App (Sippy)

August 2025 - Present

Mobile App Development Senior Design

- **Developed** a high-performance cocktail app with **offline storage, background data import**, and advanced search using provider architecture, featuring robust **error handling** and a roadmap for **community sharing, authentication, and cloud sync**.

Custom Transport Protocol

March 2025

Computer Networks Project

- **Improved** the reliability of **UDP protocol by 100%** by **implementing** a **sender and receiver class** with **TCP mechanisms**, including **sliding window flow control, sequence numbering, ACKs, retransmissions, and time recovery** with **sockets, structs, & maps** in C.

Financial Literacy App (EverVest)

Oct 2024 - Dec 2024

User-Centered Mobile App

- Developed a **high-fidelity interactive prototype** on **Figma** focused on **improving financial literacy for college students** by designing content in a rewarding Duolingo-style format.
- Gained **audience interest to 95%** by **showcasing** our prototype's features & user flow through a demo and conducting **10+ user interviews, usability tests, think-aloud evaluations, and analyzing user feedback** to guide our **iterative prototyping**.

2023 Apple Music Wrapped Showcase

April 2024

Accessible Web Development Project

- Developed a **cross-device responsive website**, enabling users to explore genres, top artists, & top songs **embedded with Apple Music players** by implementing **grid-based layouts, dynamic JavaScript interactivity, and CSS transitions/transformations** for animations.

Data Analysis of Top Artists & Songs

April 2024

Python Project

- Conducted **data analysis** to identify trends among the top 100 Billboard artists using **Python** and **SQLite**.
- Utilized the **BeautifulSoup** library to **web scrape** data and the **requests** library to gather **Spotify and iTunes API** data as **JSON** objects, stored this data in **lists**, and **populated** a structured **database** using **for loops**.
- **Analyzed and queried** the data to output **CSV files** and visualized insights on song length and genre distribution with **Matplotlib**.

Open-Source Software Contribution to ITS

April 2024

Software Engineering Project

- **Enhanced functionality** in an **open-source project** by **5%** by **resolving a bug** in **Python** using **regex** and **QA testing**.
- Created a **detailed test plan, conducted testing**, and completed the **full GitHub workflow** of **pushing code, code review, and merging**.

Instagram Clone

Jan 2024 - Feb 2024

Full-Stack Project

- Built a **full-stack** Instagram clone with **Flask, React, JavaScript, HTML, CSS, SQL**, and deployed on **AWS EC2**, replicating feed, post, and authentication functionality by implementing **RESTful APIs** in **Python**, and a **schema and database** in **SQL**.

RELEVANT COURSEWORK

- **Mobile App Development for Entrepreneurs, Operating Systems, Compiler Construction, User Interface Development, Computer Networks, Building Data-Driven Web Applications, Web Systems, Software Engineering, Web Design, Development, and Accessibility, Database Management Systems, Data Structures and Algorithms.**
